

Week Beginning: 13.2.17

Y5/6

English

Year 5 and 6 will be learning how to use figurative language by reading the poem, 'Imagine' and then writing their own poem in a similar structure.

We will then be writing a travel advert as if we are travel agents selling a holiday in space. We will be trying to use figurative and persuasive language in our writing.

Spellings will be tious/cious words.

Maths

In maths, we will be converting metric and imperial units of measure.

We will also be learning to calculate volumes of cuboids, perimeters of composite shapes, and exploring if two shapes with equal area also always have an equal perimeter.

Please continue to complete mathematics activities at home.
