

# Week Beginning: 14.11.16

## Y5/6

### English

This week year 5 and 6 are using Macbeth to learn about play scripts. We are going to explore some of the characters and relationships between them and write our own version of a scene of Macbeth in modern English.

In spelling, we are learning to add suffixes to words ending in -fer.

### Maths

This week we will be learning about angles—identifying the different kinds of angles and using a protractor to measure and draw angles.

In arithmetic we will practise calculating with decimals and at the end of the week we will explore the properties of and construct 2D and 3D shapes.
