

Week Beginning: 16.10.17

Y5/6

English

We are continuing to develop techniques used to create effective descriptive writing, including the use of figurative language (similes, metaphors, hyperbole) and describing using all of our senses. We will improve last week's descriptions of our own, invented magical shop on Diagon Alley, from the world of Harry Potter by focusing on different writing skills, one at a time.

In spellings, we are revising homophones e.g. there/their, your/you're

Maths

This week we are getting better at working with fractions! We will learn to make equivalent fractions, to use these skills to order them, and to recognise and convert mixed and improper fractions.

Keep practising those times tables to earn stickers on your Going for Gold certificate!

There will be 4 Mathletics activities to complete at home.
