

Week Beginning: 6.11.17

Y5/6

English

This week, we are beginning to explore journalistic writing. We will talk about examples of newspaper articles, and the devices they use, and we will start writing our own Harry Potter-themed articles.

In spellings, we will use etymological dictionaries and on-line translation tools to investigate Latin roots. We will identify English words that these relate to, and use Latin roots to create our own spells.

Maths

Our new maths topic is shape. We will sort and classify 2 and 3D shapes, and identify shape families. We are will investigate nets of a range of 3D shapes, and use our understanding of nets to make our own 3D shapes.

We will be signing off targets from last half-term, related to counting in multiples or powers of 10.

There will be 4 Mathletics activities to complete at home.
