

Week Beginning: 25.9.17

Y5/6

English

We are kicking off the year by learning to write explanations. This week, we are inventing our own Fantastic Beasts, and our explanations of how they have adapted to life in the rainforest will form part of a class anthology *Fantastic Beasts and Where to Find Them*.

In spellings, we will learn words for our gemstone bookmarks, concentrating on strategies which help us remember the letters within each word.

Maths

This week we are learning to use formal column methods for addition and subtraction (carrying and exchanging). Later in the week we will apply these methods to multi-step worded problems.

There will be 4 Mathletics activities to complete at home.
